Reference for the Aquator platform.

Aquator Marine is a yacht software platform designed to enhance efficiency, safety, and enjoyment in the yachting industry. This Help Center brings the complete reference documentation into a single, branded document — purpose, value, modules, and answers — for use offline, in handover packs, or as a printed onboarding aid.

The platform consolidates the tools yacht owners, captains, managers, and crew rely on day to day: navigation and fleet tracking, planned maintenance and refit, crew management and payroll, charter operations, finance and accounting, ISM and SMS compliance, and structured digital documentation. Each module is built to work alongside the others — a single record of operations, accessible from anywhere with an internet connection, secured by role-based permissions and encrypted at rest.

The pages that follow mirror the structure of the live Help Center. Start with the quick-start sequence to set up your profile and yacht, then navigate to the module group most relevant to your role. The FAQs cover the most-asked landing-tier questions, and the support section explains how to reach Jim — our AI-powered support assistant — and our human team.

New to Aquator? Start here.

Three short guides that take you from account setup to confident day-to-day use of the platform.

STEP 1

Getting Started

Set up your profile, add your yacht details, upload your registration and compliance documents, and explore the dashboard. Most yachts are operational within their first session.

STEP 2

Navigating the Platform

Find your way around the dashboard, sidebar, and modules. Learn how to use the global search bar, switch between yachts, and configure your view for day-to-day operations.

STEP 3

Support & Troubleshooting

Resolve common issues, manage user permissions, and get the most out of Jim — our AI-powered support assistant available around the clock from the three-star icon in the top menu.

Browse *by what you do.*

Aquator's modules are grouped by operational function. Use this index to locate a module quickly, then jump to its full overview and feature list later in the document.

Operations

5 MODULES

Fleet AIS Tracker	Real-time visibility of your entire fleet on an interactive map, with historical track playback, geofenced zones, and alerts.
Yacht Management	The everyday cockpit for the crew — tasks, calendar, chat, and to-dos in one place.
Yacht Planner	Snag-list management for maintenance and refit work, with GA plan annotations and progress tracking.
In/Out Board	Track crew and guest movements for security and compliance, with real-time onboard status and exportable audit reports.
Passage Planning	A structured workflow for planning, managing, and logging yacht passages — from preparation through real-time logging on arrival.

Maintenance & Engineering

5 MODULES

PMS — Planned Maintenance System	Schedule, track, and execute maintenance tasks with full equipment history.
Refit Management	Plan, execute, and financially track yacht refit projects in one place — from project tracker through to budget reporting.
Warranty Management	Oversee warranty claims, maintenance schedules, and associated costs.
New Build Management	Centralised oversight for yacht construction projects — from design through completion — combining project tracking, finance, and compliance.
Shipyards ERP	A modular ERP for shipyards — Bill of Materials, production planning, procurement, inventory, quality control, and warranty in one unified platform.

Crew & Charter

2 MODULES

Crew Management

An overview of individual crew settings — personal data, employment, payroll, certificates, leave, and emergency contacts — managed centrally.

Charter Management

An end-to-end solution for managing yacht charters — from inquiry to execution — covering bookings, payments, APA, guests, and contracts.

Finance & Accounting

3 MODULES

Finance

Tools for budgeting, expense tracking, and financial reporting.

Accounting

Track financial transactions, manage income and expenses, and produce accurate financial reporting.

Reports

Generate insights and analytics across the platform — both pre-defined standard reports and bespoke custom reports for owners and management teams.

Compliance & Documentation

5 MODULES

ISM — International Safety Management

Stay compliant with maritime safety regulations — track certifications, plan and report drills, and verify Hours of Work and Rest against MLC 2006.

SMS — Safety Management System

A digital safety-management solution that ensures compliance with maritime regulations through structured document management and pre-built templates.

Smart Documents

Create, manage, and automate essential yacht documents.

File Manager

A centralised digital repository for all yacht-related documents and files — secure storage, organised categorisation, and easy access.

Contact Manager

An address book and CRM tool — centralise clients, vendors, service providers, and stakeholders for efficient communication and relationship management.

MODULE GROUP

Operations

Day-to-day yacht and fleet operations.

5 modules in this group

Fleet AIS Tracker

OPERATIONS

Real-time visibility of your entire fleet on an interactive map, with historical track playback, geofenced zones, and alerts.

KEY FEATURES · 6 ITEMS

Map View	Live yacht locations on an interactive map.
Historical Track	Replay past movements over a selected period.
Zoning	Define geofences and receive entry/exit alerts.
Pinning	Mark dealerships, offices, and service centres for quick reference.
Hybrid View	Split-screen of the fleet list and the map.
Fleet View	All yachts in a single sortable table.

Yacht Management

OPERATIONS

The everyday cockpit for the crew — tasks, calendar, chat, and to-dos in one place.

KEY FEATURES · 4 ITEMS

Task Tracker	Manage crew assignments and onboard tasks efficiently.
Chat	Real-time messaging across the crew.
Calendar	Shared calendar visible to the whole team.
To-Do	Personal task list for each user.

Yacht Planner

OPERATIONS

Snag-list management for maintenance and refit work, with GA plan annotations and progress tracking.

KEY FEATURES · 3 ITEMS

Snag List Management	Track and prioritise yacht maintenance issues.
GA Plan Uploads	Annotate snag items directly on General Arrangement plans.
Progress Monitoring	Oversee resolution status from create to close.

In/Out Board

OPERATIONS

Track crew and guest movements for security and compliance, with real-time onboard status and exportable audit reports.

KEY FEATURES · 4 ITEMS

Crew Movement Logging

Track who is onboard or off-duty in real time.

Add Users

Include dayworkers and contractors who are not full platform users.

Reporting

Generate detailed movement reports for compliance and audits.

Geo Fencing

Auto-update onboard status based on a defined boundary.

Passage Planning

OPERATIONS

A structured workflow for planning, managing, and logging yacht passages — from preparation through real-time logging on arrival.

KEY FEATURES · 3 ITEMS

Passage Preparation

Contact lists, equipment, crew briefing, and buddy boats.

Passage Plan

Routes, tides, port details, alternatives, and watch system logs.

Passage Log

Real-time waypoints, conditions, and observations.

Maintenance & Engineering

Planned maintenance, refit, new builds, and warranties.

5 modules in this group

PMS — Planned Maintenance System

MAINTENANCE & ENGINEERING

Schedule, track, and execute maintenance tasks with full equipment history. Reduces downtime through proactive planning and keeps compliance evidence audit-ready.

KEY FEATURES · 8 ITEMS

Logs	Record and track equipment log readings and trends.
Tasks	Manage and assign specific maintenance tasks to crew members.
Purchase Orders	Create and manage POs for maintenance items.
Equipment	Track all onboard equipment and maintenance schedules.
Inventory	Monitor stock levels for spare parts and consumables.
Storage	Organise physical storage locations for maintenance items.
Categories	Categorise tasks, equipment, and inventory.
Suppliers	Manage supplier details and link them to purchase orders.

Refit Management

MAINTENANCE & ENGINEERING

Plan, execute, and financially track yacht refit projects in one place — from project tracker through to budget reporting.

KEY FEATURES · 5 ITEMS

Project Tracker	Monitor refit progress in real time.
Calendar	Schedule milestones and key tasks.
Project Planner	Manage and prioritise tasks (similar to Yacht Planner).
Gantt Chart	Visualise project timelines and dependencies.
Project Finance	Track budgets, expenses, and cost breakdowns.

Warranty Management

MAINTENANCE & ENGINEERING

Oversee warranty claims, maintenance schedules, and associated costs. Ensures warranty work is documented, scheduled, and resolved efficiently.

KEY FEATURES · 5 ITEMS

Tickets	Manage and track warranty claims and service requests.
Calendar	Schedule warranty-related tasks and maintenance.
Planner	Oversee warranty task assignments and progress.
Gantt Chart	Visualise timelines and dependencies of warranty claims.
Cost Tracking	Monitor and manage warranty-related expenses.

New Build Management

MAINTENANCE & ENGINEERING

Centralised oversight for yacht construction projects — from design through completion — combining project tracking, finance, and compliance.

KEY FEATURES · 6 ITEMS

Project Tracker	Monitor new-build tasks in real time.
Calendar	Schedule key milestones and tasks within the build timeline.
Project Planner	Manage tasks against GA plans or technical drawings.
Gantt Chart	Visualise project timelines and dependencies.
Project Finance	Track budgets, expenses, and cost breakdowns.
Smart Documents	Manage digital checklists and compliance reports.

A modular ERP for shipyards — Bill of Materials, production planning, procurement, inventory, quality control, and warranty in one unified platform.

KEY FEATURES · 6 ITEMS

Bill of Materials (BOM)	Structured parts and assemblies management.
Production Planning	Schedule and sequence yacht-build operations.
Purchasing & Procurement	Manage supplier orders and receipts.
Inventory Management	Track stock across yards and warehouses.
Quality Control	Capture inspections and non-conformities.
Warranty Tracking	Carry warranty data through to post-delivery support.

MODULE GROUP

Crew & Charter

Personnel management and charter operations.

2 modules in this group

Crew Management

CREW & CHARTER

An overview of individual crew settings — personal data, employment, payroll, certificates, leave, and emergency contacts — managed centrally.

KEY FEATURES · 6 ITEMS

Personal Information	Manage personal details and generate IMO crew lists.
Employment	View and update position, contract type, and hire date.
Payroll	Track historical payslips, salary, and contract expiry.
Certificates	Store certifications, qualifications, and expiration dates.
Leave	Request and manage leave, track balances, and view history.
Emergency Contacts	Maintain up-to-date emergency contact information.

Charter Management

CREW & CHARTER

An end-to-end solution for managing yacht charters — from inquiry to execution — covering bookings, payments, APA, guests, and contracts.

KEY FEATURES · 5 ITEMS

Charter Details	Manage charter details and schedules.
Payment Details	Track payments, invoices, and financial transactions.
APA	Monitor Advance Provisioning Allowance expenses and reports.
Guest Profiles	Store guest preferences, dietary requirements, and requests.
Smart Documents	Generate charter contracts and guest preference sheets.

MODULE GROUP

Finance & Accounting

Budgets, expenses, and financial reporting.

3 modules in this group

Finance

FINANCE & ACCOUNTING

Tools for budgeting, expense tracking, and financial reporting. Helps yacht managers and finance teams compare actual spending against budgets and generate detailed insights.

KEY FEATURES · 3 ITEMS

Budget Report	Create and manage budgets for yacht operations.
Category Report	Track actual spending by category, synced with accounting.
Budget vs Actual	Compare projected budgets against real expenditure.

Accounting

FINANCE & ACCOUNTING

Track financial transactions, manage income and expenses, and produce accurate financial reporting. Integrates with the Finance module for seamless oversight.

KEY FEATURES · 4 ITEMS

Dashboard	Overview of income, expenses, and outstanding balances.
Income	Record charter income, owner funds, and other revenue.
Purchases	Log and manage vendor payments and operational expenses.
Settings	Configure accounting preferences, tax, and integrations.

Reports

FINANCE & ACCOUNTING

Generate insights and analytics across the platform — both pre-defined standard reports and bespoke custom reports for owners and management teams.

KEY FEATURES · 2 ITEMS

Standard Reports	Pre-built templates for common metrics.
Custom Reports	Bespoke reports tailored to your operational needs.

MODULE GROUP

Compliance & Documentation

ISM, SMS, smart documents, and records.

5 modules in this group

ISM — International Safety Management

COMPLIANCE & DOCUMENTATION

Stay compliant with maritime safety regulations — track certifications, plan and report drills, and verify Hours of Work and Rest against MLC 2006.

KEY FEATURES · 3 ITEMS

Certificates	Manage certifications with structured tracking.
Drill Matrix	Plan required safety drills annually and document reports.
Hours of Work and Rest	Auto-checks compliance and flags non-compliant days.

SMS — Safety Management System

COMPLIANCE & DOCUMENTATION

A digital safety-management solution that ensures compliance with maritime regulations through structured document management and pre-built templates.

KEY FEATURES · 4 ITEMS

Library	Upload and store safety-related PDF documents.
Index	Maintain a structured index of all SMS documentation.
Templates	Predefined blank safety documents that can be filled in.
Populated	Manage completed safety forms and reports.

Smart Documents

COMPLIANCE & DOCUMENTATION

Create, manage, and automate essential yacht documents. Build custom forms, use predefined templates, and store completed documents securely.

KEY FEATURES · 3 ITEMS

Editor	Drag-and-drop form builder for custom document templates.
Templates	Predefined blank documents for quick use.
Documents	Centralised management of completed documents.

File Manager

COMPLIANCE & DOCUMENTATION

A centralised digital repository for all yacht-related documents and files — secure storage, organised categorisation, and easy access.

KEY FEATURES · 2 ITEMS

Document Storage

Securely upload and store a variety of file types.

Folder Organisation

Customisable folders and subfolders for logical filing.

Contact Manager

COMPLIANCE & DOCUMENTATION

An address book and CRM tool — centralise clients, vendors, service providers, and stakeholders for efficient communication and relationship management.

KEY FEATURES · 1 ITEM

Centralised Contact Database

Store and manage all contacts in one place.

FREQUENTLY ASKED QUESTIONS

Common questions, answered.

The most-asked questions about the platform. For specific module queries, refer to the relevant module section.

What is Aquator Marine and who is it designed for?

Aquator Marine is an all-in-one yacht management platform for owners, captains, managers, and crew. It centralises operations including finance, accounting, maintenance, compliance, crew, and charter management.

Can Aquator Marine be used for both private and charter yachts?

Yes. The platform supports both private and charter yachts, with modules that can be enabled or disabled depending on your operational needs.

Is the platform suitable for single yachts and full fleets?

Aquator Marine scales easily from a single vessel to large fleets, making it suitable for owners, management companies, and family offices.

How long does onboarding and setup usually take?

Setup time depends on the size of the vessel and the volume of historical data being uploaded. Most yachts are up and running within a few days, with full implementation typically completed within a few weeks.

Can different users have different access levels?

Yes. Aquator Marine offers role-based permissions, so owners, captains, crew, accountants, and managers see only what is relevant to them.

Is the platform cloud-based and accessible on mobile?

Yes. The platform is fully cloud-based and optimised for desktop, tablet, and mobile, making it easy for crew to update information onboard or on the go.

How secure is our data on Aquator Marine?

Data security is a priority. The platform uses secure cloud infrastructure, encryption in transit and at rest, and regular backups to protect your information.

Can Aquator Marine integrate with other tools or software?

Yes. Aquator Marine supports integrations and data exports to ensure it fits seamlessly into your existing workflows.

Three ways to get help.

Our support team — and Jim, our AI assistant — are here to help, whether you're onboarding for the first time or troubleshooting a specific module.

Talk to Jim — your AI assistant

Jim is our AI-powered support agent, available 24/7 from the three-star (★) icon in the top menu bar. Ask a question, get answers grounded in this Help Center.

[Open Jim in the platform →](#)

Direct support

Our team is available via email, phone, or live chat for onboarding, training, and day-to-day questions. Most queries are resolved within one business day.

[Contact our team →](#)

Stay updated

Aquator is continuously improved through regular releases. Subscribe to release notes or enable in-account update notifications to keep your team informed.
